

PCBSD - Bug #12104

lumina-fm unresponsive during copy/paste operation

10/28/2015 10:47 AM - JT Pennington

Status:	Screened	
Priority:	No priority

Description

Using latest commit 31a119e from github

If I right click copy and then go to paste into another folder, I cannot do anything else until that operation is complete. If I go change the path of the directory in the address bar and hit enter, it wont change. If I click the up arrow to go up a directory it wont change. Once the paste operation does finish, lumina-fm returns to its previous state. ie. If i changed the directory path, it will revert back to the path I was original in, if I have clicked to go up a directory it just refreshes the current directory I was already in.
