Thanks for the report!

1. The issue only appears to be with "mirror"; other RAID levels like "stripe" aren't affected.
2. The issue with the confusing GUI behavior will be fixed in 8.2.0. There's a lot of GUI code (dojo, dojango) that's changed here that can't really can't be backported easily.

Are you sure the pool is not created?
Or you didn't get an error in the top of the screen?
Did you refresh the screen?

#3 - 02/15/2012 03:39 PM - William Grzybowski

Oh, and yes, mirrorXXsomething is not allowed by ZFS, neither raidzXXsomething
