

FreeNAS - Bug #12790

Installation - Destination media display issues

12/15/2015 09:37 PM - Michael Bruns

Status: Resolved	
Priority: No priority	
Assignee: Sean Fagan	
Category: OS	
Target version: Master - FreeNAS Nightlies	
Seen in: 9.3.1-STABLE-201509022158	Needs Merging: Yes
Severity: New	Needs Automation: No
Reason for Closing:	Support Suite Ticket: n/a
Reason for Blocked:	Hardware Configuration: Dell PowerEdge T110 II Intel i3 CPU, 16-GB Ram 2x16 Sandisk Ultra-Fit boot drives no hard drives installed.
Needs QA: Yes	ChangeLog Required: No
Needs Doc: Yes	
Description A few issues when installing FreeNAS-9.3-STABLE-201509022158.iso - Please see screenshots: 1) Only 1 USB Flash drive in the scroll list (but seems to scroll just fine) 2) Scroll percentages are strange (550%, 5100%) 3) Drive names are identical (D10) on the scroll list 4) Installation seemed to work just fine, installed on da0 and da1.

- Status changed from Unscreened to Screened

Actually, that's due to dialog(1) -- if you type, uh, control-l or control-r (i forget which) to refresh the screen, it cleans it up.

I think I can increase the size to allow for more to be displayed.

#2 - 12/15/2015 09:57 PM - Michael Bruns

I'd recommend it. I'm new to FreeNAS, but a long-time sysadmin. While it didn't seem to affect the install at all, it was confusing.

- Status changed from Screened to Resolved

This may actually have just been fixed by William, who noticed that the TERM type was wrong. Would never have occurred to me.

Please try it with a new build. Marking this as resolved for now.

#4 - 11/22/2017 08:28 AM - Dru Lavigne

- Target version set to Master - FreeNAS Nightlies
