

FreeNAS - Bug #14

Validate GUI with MacOS Safari

11/16/2010 10:00 PM - Anonymous

Status: Closed	
Priority: Important	
Assignee:	
Category: GUI (new)	
Target version:	
Seen in:	Needs Merging: Yes
Severity:	Needs Automation: No
Reason for Closing:	Support Suite Ticket: n/a
Reason for Blocked:	Hardware Configuration:
Needs QA: Yes	ChangeLog Required: No
Needs Doc: Yes	
Description	
Need to make sure the GUI works with Safari.	

History

#1 - 11/16/2010 10:03 PM - Anonymous

verified not working on [[MacOS]] 10.5 with the latest safari.

#2 - 12/02/2010 11:59 PM - Anonymous

verified working on the iPad, perhaps the changes from ticket [#29](#) also solved this bug...

#3 - 12/03/2010 03:24 AM - Anonymous

I've switched to using Safari for all my testing. When I made my prior comment, before the changes, it was impossible to even login, and if you insisted on logging in, it was totally unusable. Now, after the changes, I've not found any screens that fail (although I haven't yet hit all of them).

#4 - 01/18/2011 10:15 PM - Josh Paetzel

- Status changed from Unscreened to Closed

#5 - 05/23/2015 11:30 PM - Jordan Hubbard

- Target version deleted (2)

#6 - 11/19/2015 01:13 PM - Kris Moore

Commit: 74ee4b3cf50478aaee3b7941ead10f2092321b8c

<https://github.com/pcbsd/freebsd-ports/commit/74ee4b3cf50478aaee3b7941ead10f2092321b8c>

Author: truckman <truckman@FreeBSD.org>

Date: 2015-11-14 (Sat, 14 Nov 2015)

Log Message:

Upgrade to version 0.9.0.

[Henry Stern]

- New "query timeout" feature which allows for a configurable timeout on the execution of certain types of queries. Introduces new function `dnstable_query_set_timeout()` and new result code `dnstable_res_timeout` ([#8](#)).

- New "time fencing" feature which filters based on 'time_first' and 'time_last' values. Introduces new enum `dnstable_filter_parameter_type` and new function `dnstable_query_set_filter_parameter()` (#9).
- Performance enhancement for some IP range and prefix searches (#11).
- Fix unhandled IPv4/IPv6 address overflow for IP range/prefix queries (#14).

[Robert Edmonds]

- `dnstable_convert`: Assert vendor 'SIE' and message type 'dnstdedupe' so that the following cast of the return value of `nmsg_message_get_payload()` is safe (#10).
- Use `CLOCK_MONOTONIC_COARSE` rather than `CLOCK_MONOTONIC_RAW` for query timeouts (#12).
- `query_iter_next_ip()`: Fix zero fill condition (#15).

Log Message:

www/magento: use databases/php56-redis instead of expired databases/php5-redis for REDIS

Both ports are at the same version of redis, and the option is off by default.

Commit: 3bd19b1310a12a6bae51db5d7ca2d6a6ed1aed17

<https://github.com/pcbsd/freebsd-ports/commit/3bd19b1310a12a6bae51db5d7ca2d6a6ed1aed17>

Author: truckman <truckman@FreeBSD.org>

Date: 2016-02-03 (Wed, 03 Feb 2016)

Log Message:

Upgrade net/nmsg to 0.11.0:

nmsg (0.11.0)

[Henry Stern]

- Add an interval randomization option that randomizes the initial offset within the selected time interval. This functionality is exposed via the libnmsg `nmsg_io_set_interval_randomized()` function and the `nmsgtool -R / --randomize` command-line option ([#27](#), [#33](#)).
- Add documentation for `nmsgtool -j / --readjson` and `-J / --write-json` command-line options ([#26](#), [#28](#)).
- Add `PKG_CHECK_MODULES` dependency on `yajl >= 2.1.0` ([#29](#), [#31](#)).
- Make `nmsgtool -k / --kicker` work when combined with `-c` or `-t`, when producing output in JSON format ([#25](#), [#38](#)).
- Fix compiler warning [-Wtautological-compare] in `_nmsg_msgmod_json_to_payload_load()` ([#36](#), [#39](#)).
- Add `nmsg_message_get_num_field_values()`, `nmsg_message_get_num_field_values_by_idx()` functions ([#5](#), [#40](#)).

[Robert Edmonds]

- Remove the unused enum `nmsg_modtype` from the internal libnmsg API ([#30](#)).
- Header file cleanups ([#14](#), [#34](#)).
- Rewrite `nmsg_res_lookup()` to use a switch, which eliminates a Clang warning ([#14](#), [#35](#)).
- Add a message filtering capability to the libnmsg I/O loop, including external filter module plugin and `nmsgtool` support ([#41](#), [#43](#), [#44](#)).

[Mike Schiffman]

- Add `yajl/` prefix to `#include`'s of `yajl` headers ([#37](#))
