

PCBSD - Feature #15303

Add scan function to Setup Replication in LP

05/12/2016 05:20 AM - Dru Lavigne

Status:	Screened	Estimated time:	0.00 hour
Priority:	Nice to have		
Assignee:	Ken Moore		
Category:	sysadm		
Target version:	11.0-RELEASE		
Description			
This first needs to be added to the API, then to the Replications tab. This is to remain backwards compatible with the original Life Preserver which supported scanning for available SSH servers.			

History

#1 - 08/09/2016 06:16 AM - Kris Moore

- Status changed from Unscreened to Screened
