Seen in:	10.3-RELEASE

Description

I updated my system packages using: 'pc-updatemanager pkgupdate';
This issue has to do with in particular the the update pkg: 'print/cups-filters-1.10.0'

pc-updatemanager.log shows:

```
[199/1129] Deleting files for cups-filters-1.8.3...  
pkg: /usr/local/etc/cups/cups-browsed.conf different from original checksum, not removing
```

Compared with a backup of the original .conf the custom .conf file got overlayed.
The actual result is:

```
# ls -la /usr/local/etc/cups/cups-browsed.conf*  
-rw-r--r--  1 root  wheel  15449 Aug 23 22:54 cups-browsed.conf  
-rw-r--r--  1 root  cups   15342 Oct 14 20:01 cups-browsed.conf_bkup001
```

None of the other .conf files appeared to have been affected.

Note: The following files have NEW '.sample' configs:

```
ls -la /usr/local/etc/cups/*.sample  
-rw-r-----  1 root  cups    2965 Aug 23 21:48 /usr/local/etc/cups/cups-files.conf.sample  
-rw-r--r--   1 root  wheel    9521 Aug 24 00:22 /usr/local/etc/cups/cups-pdf.conf.sample  
-rw-r-----  1 root  cups    4501 Aug 23 21:48 /usr/local/etc/cups/cupsd.conf.sample  
-rw-r-----  1 root  cups     142 Aug 23 21:48 /usr/local/etc/cups/snmp.conf.sample
```

I was updating from:

```
uname -a  
FreeBSD MT2016 10.3-RELEASE-p5 FreeBSD 10.3-RELEASE-p5 #0: Thu Jun 30 03:52:15 UTC 2016  
root@amd64-builder.pcbsd.org:/usr/obj/usr/src/sys/GENERIC amd64  
.  
FreeBSD ver:.....10.3-RELEASE-p5  
Package set:.....:EDGE  
PC-BSD CLI:...r1466647993  
.  
to:  
uname -a
```

```
FreeBSD MT2016 10.3-RELEASE-p5 FreeBSD 10.3-RELEASE-p5 #0: Thu Jun 30 03:52:15 UTC 2016
root@amd64-builder.pcbsd.org:/usr/obj/usr/src/sys/GENERIC amd64
```

```
FreeBSD ver:.....10.3-RELEASE-p5
Package set:.....:EDGE
PC-BSD CLI:...r1474373062
```

```
pkg --version : 1.7.2
```
