#### Description

Hello,

I configure LACP on my freenas:

```
1. ifconfig lagg0
   lagg0:
   ...
   laggproto lacp lagghash I2,I3,I4
   ...
```

but then I configure laghash I2,I3 in Network options field.

```
1. ifconfig lagg0
   lagg0:
   ...
   laggproto lacp lagghash I2,I3
   ...
```

So, as I can see, options was changed, BUT after system reboot I still see default configuration: lagghash I2,I3,I4... Seems Options field does not apply after FreeNAS Reboot

- Assignee changed from Kris Moore to William Grzybowski
- Priority changed from No priority to Important
- Target version set to 9.10.3

**#4 - 03/13/2017 09:08 AM - William Grzybowski**

- Status changed from Unscreened to Screened

**#5 - 03/24/2017 04:55 AM - William Grzybowski**

- Status changed from Screened to Needs Developer Review

Thanks for the report.

It should be fixed in the next release.

For the release manager: I am asking explicit review for this change since it may have some unpredictable side effect.
