Seems to be panicing on fdscfs mount? Any ideas Sasha?

It indeed seems crashing during fdscfs mount while trying to check jail permission and something on that pointer chain is not there. I'll update my test machine, but so far I haven't seen such issue. Is it repeatable?

Bonnie will see if she can reproduce on the other Mini.

#6 - 04/11/2017 06:56 AM - Alexander Motin

So far I have no any evidenced that it may be FreeNAS-related (other then it happened there), so proving that may be interesting. Is it reproducible on this system after reboot, or it is something sporadic?

#7 - 04/11/2017 12:57 PM - Bonnie Follweiler

I was unable to reproduce that particular issue on my mini.

#8 - 04/12/2017 05:49 AM - Dru Lavigne

- *Status changed from Screened to Closed: Cannot reproduce*

After wiping all of the drives on this system the panic is no longer reproducible.
