I have added the artifact files here:

<https://github.com/iXsystems/iocage-plugin-jenkins/commit/097421a67e8b5a257123fcac90ff22f96a60c26f>

I believe all that is needed is for a json configuration to be added, and index over here:

<https://github.com/iXsystems/iocage-ix-plugins>

Is it enough just to add the entires, and use the same fingerprint as all of the others in the json? I would assume the pkg repo would have to be rebuild as well?

LGTM, I renamed the iocage.json you put into the repo as jenkins.json. But everything else looks fine.
