

FreeNAS - Bug #23493

Fix VM stop

04/21/2017 11:31 AM - Anthony Takata

Status: Resolved	
Priority: No priority	
Assignee: Marcelo Araujo	
Category: Middleware	
Target version: 11.1-BETA1	
Seen in: 9.10.3	Needs Merging: Yes
Severity: New	Needs Automation: No
Reason for Closing:	Support Suite Ticket: n/a
Reason for Blocked:	Hardware Configuration: FreeNAS-11-MASTER-201704210416 (196a1c9)
Needs QA: No	ChangeLog Required: No
Needs Doc: Yes	
Description On occasion bhyve freezes while maxing out CPU on one of the threads (seems to be a VirtIO issue without further diagnosis). At this point I need to kill the VM, but the "Stop" button doesn't seem to be able to do this like it does in Corral. Instead, it seems to just send the ACPI Shutdown request and that's it, and I have to kill -9 the bhyve process to actually shut it down. I'd like to see the State to be "Stopping" and if the user clicks the Stop button once again, a kill command should be issued.	
Related issues: Is duplicate of FreeNAS - Bug #23975: Feature Request: VM Poweroff button Closed: Duplicate 05/15/2017	

Associated revisions

Revision b75967f9 - 05/23/2017 08:16 PM - Marcelo Araujo

fix(vm): Gracefully stop vm using bhyvectl(8).
