Description
Recommend we cherry pick and/or backport this useful update (revision 318449) into FreeNAS STABLE:
<https://svnweb.freebsd.org/base?view=revision&revision=318449>
especially now that we have compressed ARC in 9.10.

- Status changed from Unscreened to Resolved

- Target version changed from 49 to 11.1

The commit you mention was done into FreeBSD stable/11 branch. It means one will be automatically part of the further FreeNAS 11.1 release. Unfortunately FreeNAS 11.0 release is already too deep in release cycle to add new features there.
