Backend has been merged, this is how it works

```
group.query [{"id", "=", group_id}]
```

will return you `users` attribute with user ids, then you can query user with:

```
user.query [{"id", "in", list_of_ids}]
```

To update members/users of a group, you do:

```
group.update group_id {'users': list_of_ids}
```
