

FreeNAS - Bug #25010

Resolve keymap warning during boot by getting keymaps from vt instead of syscons

07/05/2017 02:34 PM - Vinícius Ferrão

Status: Done	
Priority: Nice to have	
Assignee: William Grzybowski	
Category: Middleware	
Target version: 11.2-BETA1	
Seen in: 11.0-U1	Needs Merging: No
Severity: New	Needs Automation: No
Reason for Closing:	Support Suite Ticket: n/a
Reason for Blocked:	Hardware Configuration:
Needs QA: No	ChangeLog Required: No
Needs Doc: No	

Description

After upgrading FreeNAS to 11.0-U1 a new warning appears at the end of the boot process. The message says:

WARNING:

```
New keymap: In /etc/rc.conf replace 'keymap=us.iso.acc' by 'keynap=us.acc'.
```

On the web interface of FreeNAS I've selected "United States of America ISO-8859-1 (accent keys)" as the default keymap.

This is probably cosmetic and just an annoyance, but would be nice to be fixed.

History

#1 - 07/05/2017 02:48 PM - Dru Lavigne

- Assignee changed from Release Council to William Grzybowski

#2 - 07/06/2017 06:28 AM - William Grzybowski

- Status changed from Unscreened to Screened
- Priority changed from No priority to Nice to have
- Target version set to 11.1

#3 - 07/19/2017 08:57 AM - William Grzybowski

- Target version changed from 11.1 to 11.2-BETA1

This is because we use freebsd syscons for BIOS boot and vt for UEFI. GUI is only prepared for syscons.

I'll re-target this to 11.2 because we maybe switch to VT for everything.

#4 - 12/18/2017 12:25 PM - Dru Lavigne

- Status changed from Screened to 15

Vinicius: does this warning still appear in 11.1?

#5 - 12/26/2017 07:35 AM - William Grzybowski

- Status changed from 15 to Screened

#6 - 12/26/2017 07:36 AM - William Grzybowski

Nothing has changed in that regard, there is no reason to ask user to retest.

As you pointed. The issue persisted.
