Target version:	11.0-U3	
Seen in:	11.0-U2	Needs Merging: Yes
Severity:	New	Needs Automation: No
Reason for Closing:		Support Suite Ticket: n/a
Reason for Blocked:		Hardware Configuration:
Needs QA:	No	ChangeLog Required: No
Needs Doc:	Yes	

Description

I'm debugging the issues with my LDAP connection after upgrading to FreeNAS 11.

After (re)boot I get an "yellow" warning stating:

```
WARNING: July 27, 2017, 2:39 p.m. - LDAP did not bind to the domain
```

After noticing that the sssd.conf generation was buggy (already reported here: <https://bugs.freenas.org/issues/25326>) and generating a functioning sssd.conf, the warning still shows up. But the LDAP connection works for all shares and also in the terminal.

Where does this message come from? And why does it show, if LDAP is obviously working?
