Description	
after i've update verion i can't see my previus extents and targets.	
if i browse volume from add new extents i find my extents but i don't know how can use it anymore.	
thanks for your attention	

History

#1 - 08/01/2017 09:05 AM - Massimiliano Antonini

- File debug-DataStoreNAS01-20170801180545.txz added

#2 - 08/02/2017 05:40 AM - Dru Lavigne

- Status changed from Unscreened to 15

- Assignee changed from Release Council to Alexander Motin

Massimiliano: which version did you upgrade from?

#3 - 08/02/2017 06:19 AM - Alexander Motin

- Target version set to 11.1

- Seen in changed from Unspecified to 9.10.2-U6

Could you describe also what exactly have you done? In provided debug information I see that both your boot and data pools were created on 2017-07-27, and what is curios, your boot pool was created 30 minutes later then data pool so I suspect you reinstalled FreeNAS more then once. Can't it be that you somehow wiped your previous data (assuming there was something earlier that that)?

#4 - 08/10/2017 12:16 PM - Dru Lavigne

- Status changed from 15 to Closed: Insufficient Info

- Target version changed from 11.1 to N/A

Massimiliano: timing out. Please add a comment to this ticket if you have more information for Alexander and we'll reopen it.

#5 - 08/15/2017 07:00 AM - Dru Lavigne

- File deleted (*debug-DataStoreNAS01-20170801180545.tgz*)

#6 - 08/15/2017 07:00 AM - Dru Lavigne

- Private changed from Yes to No
