Description

The port option to the UPS popup window in 9.10.x lists various serial ports /dev/cuauX and USB ports named as /dev/ugenX.X by default.

However, some UPSes use HID USB drivers, like some APC models, (specifically APC Back-UPS Pro 500).

It was not clear that I can change the port field to be /dev/uhid0 for my UPS.

William: will the code automatically add UHID devices to the drop-down menu? When you are finished with any code changes, please pass back to Warren for doc updates.
