Description

In FreeNAS-11-MASTER-201711240409, using the old UI I wanted to create a Windows share, but the Browse option hung. I used the old UI as I was demoing a feature in FN 11.1 that will be in TrueNAS 11.1, so I could not use the new UI. See attached file.

Gary: we're rolling RC2 now (will be ready in a few hours). Can you test that to see if the error persists on RC2?

- Assignee changed from Release Council to William Grzybowski

Confirmed in the latest nightlies(FreeNAS 11-Master-201711240409)

In the old UI it does exactly what Gary described.

In the new UI it wont look at the dataset. It doesn't show that there is any volumes/datasets at all in the Windows (SMB shares) choices I have included screenshots of both.
