Associated revisions

Revision 21f0efb6 - 12/28/2017 05:22 PM - Erin Clark

Make reboot page show up on reboot events, add shutdown page for shutting down, hide login page while websockets are not available and add loader to update pages

Ticket: #27357
#27453
#27068
#27444

Revision 2e03acd4 - 01/03/2018 11:29 AM - Erin Clark

Change requirement for login button so it doesn't get arbitrarily disabled by tin foil hat browsers.

Ticket: #27444

History

#1 - 12/27/2017 11:35 AM - Kris Moore

- Status changed from Untriaged to Unscreened
- Assignee changed from Release Council to Anonymous
- Priority changed from No priority to Critical
- Target version set to 11.2-BETA1

#2 - 12/27/2017 02:51 PM - Anonymous

- Assignee changed from Anonymous to William Grzybowski

This issue doesn't seem to be on the UI side, I can build the UI and use it against an older middleware just fine, William is something going on on the middleware side?

#3 - 12/27/2017 02:59 PM - William Grzybowski

- Assignee changed from William Grzybowski to Anonymous

No as far as I am aware. Middleware QA tests are happy.

#4 - 12/27/2017 04:06 PM - Anonymous

- Status changed from Unscreened to Screened

Alright well maybe tomorrow's nightly will work a little better. Websockets are giving me "502 Bad Gateway", we have seen nightlies in the past few weeks with websocket issues and after a few days a new one builds and works fine.

#5 - 12/27/2017 04:24 PM - William Grzybowski

If the UI cant connect to websocket it should be absolutely explicit about it and not even show login form.

#6 - 12/27/2017 04:27 PM - Anonymous

Actually upon reboot I am now noticing that it is not having that problem, I will hang on to this ticket for a day and see if we are still having any issues tomorrow

#7 - 12/27/2017 04:35 PM - Anonymous

Good point William, I will make a separate ticket for that one. also while my UI is able to login, various things in the UI are not working. It seems pretty inconsistently broken.

#8 - 12/27/2017 04:51 PM - Anonymous

Upon further inspection, my other issues were fixed with a hard browser refresh, must have been a caching problem.

#9 - 12/28/2017 07:53 AM - Rishabh Chauhan

- Subject changed from Un able to login to the latest nightlies 12/27/2017 to Unable to login to the latest nightlies 12/27/2017 I think the latest nightly is still (FreeNAS-11-MASTER-201712250515)

Interestingly, I was able to login after updating it to the latest nightly today. After restarting the browser, I was not able to login again... and i think latest nightly is still FreeNAS-11-MASTER-201712250515! although it should be 20171228.

20171228 did not build because of builder problems.

20171228 did not build because of builder problems.

I have restarted the build a couple hours ago, it should be ready by now, BTW.

Thanks william, I checked the update..it is showing 20171228 now :D

#13 - 12/28/2017 10:26 AM - Anonymous

I just updated to FreeNAS-11-MASTER-201712270505 too, are you still having difficulty logging in?

#14 - 12/28/2017 05:15 PM - Anonymous

- Related to Bug #27453: Login page should tell the user if websockets are failing added

#15 - 12/28/2017 05:34 PM - Anonymous

There is a fix in this PR that should hide the login page and show a message about the system not being available if the websocket is not connected, it should hopefully help with this in the future
