- Assignee changed from Lola Yang to William Grzybowski

It is because the interface uses DHCP. If the interface bind to an IP address, it will be good.

Why should that matter at all?

#6 - 01/09/2018 03:26 AM - Dru Lavigne

- Status changed from 15 to Screened

I checked the code. Actually, the first filed should be named NIC instead of Interface. it is using the call ```this.ws.call('notifier.choices', ['NICChoices', []]);``` to get all NIC choices, Which is the same as the old UI. is that correct API called?

#8 - 01/11/2018 03:19 PM - Lola Yang

It should be:

```
this.ws.call('notifier.choices', [ 'NICChoices', [false, false, true, false, false, true] ])
```

(yes, I know, very cryptic :), but this is part of the legacy API which will be reworked someday ;)
