<b>Description</b> Hi,  Thanks for adding the Cloud Sync service! I have been using rclone for this for years.  We sync to Wasabi, a 100% S3 compatible service. The <b>only</b> change required, is to set `endpoint-url=https://s3.wasabisys.com`  Please consider either exposing an editable endpoint-url in the cloud credentials for S3, or add Wasabi as an option :)  Many thanks,  Geoff
