After unlocking the volume via the old UI, the new UI shows the content, but still doesn't provide an option to lock the pool.

found lock wasn't there either.. Which Ive added.

have the unlock totally in place.. but the /api/v1.0/storage/volume/{{id:name}}/unlock takes a required parameter called passphrase. The old UI doesn't ask passphrase.. So Im not sure where to get the passphrase to satisfy the api. Going to ask William about where it is.. Sorta hoping.. It's internally stored and the parameter becomes optional.

**#12 - 01/30/2018 08:36 AM - Peter Southwell**

- Status changed from Not Started to In Progress

have this working save one issue wiht unlock api... I think the passphrase should be optional.. and if not.. Used from geli on the server.. via passphrase file.

**#13 - 01/31/2018 10:03 AM - Peter Southwell**

- Status changed from In Progress to Done
- % Done changed from 90 to 100

unlock code is there.. pending a UI request for the API.

also.. this is a sorta repeat bug of <https://redmine.ixsystems.com/issues/27486>

The volume is now displayed as a first class citizen expansion panel.. Where the volumes dataset is included in the expanded panel.

\*Note.. I had to add Lock as well.
