Jails/mount points/add page; "storage-form": missing check boxes

Severity:	Needs Automation: No

Needs QA: No	ChangeLog Required: No
Needs Doc: Yes	
Description On the Jails/mount points/add page the destination object doesn't match up with the old GUI. It seems it needs to be an "explorer" type. I did notice that in the "storage-form.component.ts" type explorer was commented out. Also, there should be a "read-only" check box and a "create directory" checkbox. See attached screenshot of the documentation.

iocage will create the destination directory if it doesn't exist, we don't need the "create directory" checkbox.
