It doesn't help, that the request is written in some language

Based on:

```
[homes]
  valid users = %U
  path = "/mnt/TOMMY1/%U"
```

and

```
[2018/02/05 18:11:02.424988, 0] ../source3/smbd/service.c:774 (make_connection_snum)
  canonicalize_connect_path failed for service Gate, path /mnt/TOMMY1/gatebrasil_live.com
```

I can guess that user tries to login with his W10 Live.com account to Samba share, which isn't going to work.
