<b>Description</b>	
Hey there,	
I found two things which where broken,	
<ul style="list-style-type: none"><li>- First on the new gui we're unable to select a user or group from active directory. On the old one it's working</li><li>- Sometimes our shares delete the selected ad users and groups and replace this with root and wheel on all shares.</li></ul>	
I do not know if here's already a task for it, so when yes I'm sorry I am.	
best Regards, David Faller
