Description

I'm testing and adding tooltips for the new UI with my FreeNAS 11-Nightlies box. I noticed there seems to be inconsistencies in naming elements in the UI, especially amongst the the top area "addresses" and occasionally between these elements and the left-side menu. It may be helpful to users and prevent confusion if these elements had a standard syntax and all matched in elements of capitalisation, spacing, and abbreviations. I've attached a few screenshots that show the differences in naming.
