

FreeNAS - Feature #29661

Umbrella # 29625 (Done): Add translation markers to the UI

Add translation markers to ISCSI shares

03/12/2018 06:06 PM - Erin Clark

Status: Done	Estimated time: 0.00 hour
Priority: Important	
Assignee: Lola Yang	
Category: GUI (new)	
Target version: Master - FreeNAS Nightlies	
Severity:	Needs Merging: Yes
Reason for Closing:	Needs Automation: No
Reason for Blocked:	Support Suite Ticket: n/a
Needs QA: Yes	Hardware Configuration:
Needs Doc: Yes	

Description

The ISCSI shares needs to be translatable. Any text that goes into the tooltip component will automatically be translated, all you need to do is add the T() marker, see Account Users for an example. In order to extract strings that are not in tooltips (either in the html or the ts files) you will need to pass them through the ngx-translate service, see examples from the login page or the admin bar. After they are passed through you should be able to run 'npm run extract' and the new keys will appear in the PO files.
