<b>Description</b>	
<p>I have a test VM with 4 plugins installed and functioning right now, if I go to the "installed plugins" menu, I can clearly see the plugins are running and granted an IP address. (Why it says "epair0b 192.168.117.136" rather than just "192.168.117.136" I'm unsure)</p> <p>Clearly these plugins are running inside the jail of the same name, yet the jail menu doesn't contain the IP4 address for some reason, it just says "none"</p> <p>I suspect something is going wrong, causing this to not be populated.</p> <p>Nightly, 16/Apr version.</p>

Nothing is wrong with the it. `epair0b|192.168.117.136` means DHCP is enabled.  
Jail UI should show the ip address too, already created a ticket for the middleware.

#### #5 - 04/16/2018 04:20 PM - Lola Yang
