FreeNAS - Bug #33315

When creating Cloud Sync tasks, there is no way to tell which provider goes with which set of credentials

Needs QA:	Yes	**ChangeLog Required:**	No
Needs Doc:	Yes		

Description

In Tasks/Cloud Sync Tasks/Add, there is a dropdown for Credential. This list shows only the names of cloud credentials. There is no way to tell which cloud provider is being used by a credential unless the user has added that to the name.

The dropdown should have a second column which shows the name of the provider.
