| Description | |
| <p>The UI uses in some places a "fab" icon (three horizontal lines) to house multiple options. At Warren's request (and my agreement), I'm opening a general ticket to track where these icons are used. These should be reworked/removed in the interest of simplifying UI flow and preventing user confusion.</p> <p>Locations with fab icon (checked with 5/21 nightly):</p> <p>Virtual Machines Virtual Machines/Devices</p> <p>I plan to do a full check and update the list with more entries later.</p> | |

The Jails fab button is also unnecessary and confusing. It only has Add Jail and Jail Wizard, and can be replaced by a simple + to create a jail with the wizard. If the user wants advanced settings, they can then edit that jail.
