Needs Doc:	Yes	

Description

hw:
supermicro jbod
LSI 9207 SAS HBA
a bunch of dual sas disks, sas enclosures connected with two sas ports.

steps to reproduce:
added some new dual sas devices to my freenas box,
reboot the server.
they do not show up in the multipath section within the webui

dmesg:

```
[root@freenas ~]# dmesg
Local NSM refuses to monitor vYellow.we.intern
make_dev_physpath_alias: WARNING - Unable to alias gptid/087b49fa-560b-11e3-9fa1-002219573d63 to

```

added them via cli:
[root@freenas ~]# gmultipath label -v disk11 /dev/da21 /dev/da22
Done.

now freenas shows them within the web interface.

History

#1 - 11/25/2013 09:58 PM - Josh Paetzel

- Status changed from Unscreened to Screened
- Assignee set to Josh Paetzel
- Target version set to 4.9

The error is unrelated.

Is this something you can experiment on?

#2 - 05/27/2014 08:09 AM - Josh Paetzel

- Status changed from Screened to Closed: *Insufficient Info*

Closing due to lack of feedback. If you get to a point where you can work on this reopen the bug please. I **think** your issue may be fixed in 9.2.1.5 btw.

#3 - 07/19/2017 08:42 AM - Kris Moore
