

FreeNAS - Bug #35215

Fix smart.nawk script in freenas-debug SMART section

06/18/2018 01:32 PM - Caleb St. John

Status: Done	
Priority: No priority	
Assignee: Caleb St. John	
Category: OS	
Target version: 11.1-U6	
Seen in: 11.1-U5	Needs Merging: No
Severity: Low	Needs Automation: No
Reason for Closing:	Support Suite Ticket: n/a
Reason for Blocked:	Hardware Configuration:
Needs QA: No	ChangeLog Required: No
Needs Doc: No	
Description	
I accidentally removed an "echo /dev/\$i" portion of smart.sh in the freenas-debug section.	
This does not break functionality, it just makes the smart.nawk output omit the /dev/da** number in the smart.txt output.

- Has duplicate Bug #37163: *SMART debug output doesn't list device ids anymore added*

#8 - 08/07/2018 07:11 AM - Caleb St. John

How to test this change:

1. run "freenas-debug -S" from cli

Output should look similar to below:

```
/dev/da9 HGST:7200:HUS726040AL4210:N8G1ATTK C:34 dR:0 dW:0  
/dev/da8 HGST:Solid:HUSMR1640ASS200:0KWV9ZTA C:29 dR:0 dW:0
```

Specifically look for the /dev/da* entries at the beginning of the output.

Thanks,
Caleb St. John
