Add dummy input fields to prevent the browser from auto-filling passwords

Ticket: #35374

#### History

##### #1 - 06/20/2018 12:02 PM - Erin Clark

- Status changed from Unscreened to Closed
- Reason for Closing set to Cannot Reproduce

Myself VB and Bonnie cannot reproduce it currently, closing this ticket. Please reopen if it happens again and can be reproduced

##### #2 - 06/20/2018 01:52 PM - Dru Lavigne

- Target version changed from Backlog to N/A

##### #3 - 06/21/2018 12:44 PM - Bonnie Follweiler

- Status changed from Closed to Unscreened

I reproduced it by doing a clean install of the latest Internal (Internal8), then I created a new user. I created a dataset and to the user to edit it so I could add the newly created home share. The user came in with the password filled "\*\*\*\*\*" and the confirm password empty. In order to save any changes I have to add the confirmation password

**#4 - 06/21/2018 12:45 PM - Bonnie Follweiler**

- File Screen Shot 2018-06-21 at 3.44.54 PM.png added

**#5 - 06/22/2018 12:02 PM - Erin Clark**

- Status changed from Unscreened to In Progress
- Assignee changed from Erin Clark to Vaibhav Chauhan
- Target version changed from N/A to 11.2-BETA2
- Severity changed from New to Med High

It seems the problem is that the browser is autofilling password fields if the user saved their login credentials, this may affect all password fields and not just the users one.
