<b>Needs QA:</b> No	<b>Hardware Configuration:</b>
<b>Needs Doc:</b> No	

**Description**  
We need to change legacy UI to change permissions using middlewared calls (this is to make sure v1.0 API will continue working as expected)  
We have an existing call called pool.dataset.permission which should be used and make sure it has all the logic it needs extracted from legacy UI.

**Risk**  
This is a medium/high risk task, we may introduce new bugs on changing dataset permissions.

**Acceptance Criteria**  
When this is done we should be able to continue to changing permissions of datasets at full extent when using legacy UI.

- *Status changed from Ready for Testing to Passed Testing*
- *Needs QA changed from Yes to No*

I am able to confirm middleware feedback when changing permissions in the legacy UI. Also tested in the new UI to make sure.
