

FreeNAS - Bug #36003

Use default values for fields omitted in update request

06/27/2018 08:44 AM - Vladimir Vinogradenko

Status: Done	
Priority: No priority	
Assignee: Vladimir Vinogradenko	
Category: Middleware	
Target version: 11.3-ALPHA1	
Seen in: Master - FreeNAS Nightlies	Needs Merging: No
Severity: Low	Needs Automation: No
Reason for Closing:	Support Suite Ticket: n/a
Reason for Blocked:	Hardware Configuration:
Needs QA: No	ChangeLog Required: No
Needs Doc: No	
Description	
<pre>freenas# midclt call afp.config {"id": 1, "guest": false, "guest_user": "nobody", "bindip": ["127.0.0.1"], "connections_limit": 50 , "dbpath": "", "global_aux": "", "map_acls": "rights", "chmod_request": "preserve"} freenas# midclt call afp.update '{}'</pre>	
<pre>{"id": 1, "guest": false, "guest_user": "nobody", "bindip": [], "connections_limit": 50, "dbpath": "", "global_aux": "", "map_acls": "rights", "chmod_request": "preserve"}</pre>	
Note `bindip` changing to `[]`, things like this should not happen.	
Risk	
This is a medium/high risk task, we may introduce new bugs accidentally or if something was relying on that (wrong) behavior.	
Acceptance Criteria	
All `update` methods for all plugins when being called with empty `data` argument should not update anything. This should be checked with automatic tests.
