<b>Description</b>	
Many if not all confirmations show "Ok", which by several accounts should be "OK" or Okay, not Ok:	
<a href="https://www.grammarly.com/blog/ok-okay/">https://www.grammarly.com/blog/ok-okay/</a>	
<a href="https://english.stackexchange.com/questions/25617/difference-between-ok-and-okay">https://english.stackexchange.com/questions/25617/difference-between-ok-and-okay</a>	
"Ok" is too informal.

UI Meeting: Buttons should be flat with semi-bold all caps text with default highlighted as per Material Design spec.

"Start scrub" for scrubs.

Theme might need adjusted if the default button color is unreadable, theme picker should calculate the color appropriately.

Commit 2d2d977 'flattens' all raised buttons except the example buttons on the Custom theme page. Also, it renders all buttons in Caps. A few pages (VM, Services) have a three-button 'toggle group' at the top, which kind of looks like the raised buttons, but it is a separate kind of component and I'm not sure if it should be rendered like regular buttons.
