Testing with FreeNAS Mini manually updated to FreeNAS-11.2-MASTER-201807110935:

Go to Storage/Pools/Add Zvol. Confirm "Sparse" field name.

Go to VMs/Wizard:

- Create VM "err"
- Attempt to create standard VM "err" and verify error message appears and the typo is fixed.
- Create Docker Host "err".
- Attempt to create new Docker Host "err" and verify error message appears and the typo is fixed.
