Description I have a FreeNAS system with 11.2-BETA1 freshly installed. I attempted to switch update trains from FreeNAS-11.2-STABLE to FreeNAS-11-Nightlies for RC1 testing, but saw a "This operation is not permitted as it is considered a downgrade..." error message. I discussed it with Joe M in QA and determined it is a bug, but only with the new UI. Changing trains works fine in the legacy UI.
