

FreeNAS - Feature #37642

Umbrella # 25917 (Done): Move business logic from Django to middlewared and make websocket API feature complete

Convert Storage:Volume Remove Recovery Key to Middlewared

07/11/2018 08:59 AM - William Grzybowski

Status: Done	Estimated time: 0.00 hour
Priority: Expected	
Assignee: William Grzybowski	
Category: Middleware	
Target version: 11.3-ALPHA1	
Severity: Medium	Needs Merging: No
Reason for Closing:	Needs Automation: Yes
Reason for Blocked:	Support Suite Ticket: n/a
Needs QA: No	Hardware Configuration:
Needs Doc: No	

Description

We need to change legacy UI to remove recovery key to a volume using middlewared calls (this is to make sure v1.0 API will continue working as expected)

We need to create associated middlewared API transferring logic from legacy UI code.

Risk

This is a medium risk task, we may introduce new bugs on remove recovery key.

Acceptance Criteria

When this is done we should be able to continue to removing a recovery key a volume at full extent when using legacy UI.

- Needs QA changed from *Yes* to *No*

Test Passed FreeNAS-11.3-MASTER-201903211102

Assuming I am understanding the acceptance criteria, for a locked volume, removed recovery key. Downloaded another key, locked and unlocked volume successfully.
