Description

Testing with FreeNAS system updated to FreeNAS-11.2-MASTER-201807120858:

I navigated to System/Update/Manual Update and clicked "Save Config". There appear to be a number of errors on this screen:

1. The Breadcrumb/Navigation path reads "System / Update / config / Manual Update". Should it read "System / Update / Manual Update / Save Configuration"?
2. Spelling error in text: "Select which options you would llike to export in the config file." Suggested rework: "Select options to export in the configuration file."
3. "Export Password Secret Seed" option appears to be a different font and isn't properly aligned with the checkbox.
4. Not sure on this one, but should the "Save" and "Cancel" buttons be flat to match the general design?
