

FreeNAS - Bug #39947

Ensure VM name is unique, regardless of type of VM

07/27/2018 01:07 PM - Michael Reynolds

Status: Done	
Priority: No priority	
Assignee: Vaibhav Chauhan	
Category: GUI (new)	
Target version: 11.2-BETA3	
Seen in: Master - FreeNAS Nightlies	Needs Merging: No
Severity: New	Needs Automation: No
Reason for Closing:	Support Suite Ticket: n/a
Reason for Blocked:	Hardware Configuration:
Needs QA: No	ChangeLog Required: No
Needs Doc: No	
Description	
<p>In https://redmine.ixsystems.com/issues/35359 we added the prevention of creating a VM with the same name. This prevents a Docker VM from having the same name as an exiting Docker VM or a bhyve VM being named the same as an existing bhyve VM</p> <p>We also need to prevent a Docker VM being named the same as a bhyve VM and vice versa</p>

- Status changed from Unscreened to Blocked

- Assignee changed from Vaibhav Chauhan to Michael Reynolds

I disagree with this ticket as I can think of a scenario where a user would like to have a VM/docker with the same name, as they are with different type [Bhyve or Container Provider]. what if a user wants to have a VM/Docker with same name but different type ?
