Description

The current favicon used for the webui is very pixelated/low-res compared to the favicon used for the userguide.

See FreeNAS-favicon-2018-07-30.png

This screenshot is the webui (on the left) and the userguide (on the right).

While opening the ticket I checked out the properties and found there are many different favicons in the /ui/assets/images/ dir. Almost all of them look like they were sent to us via fax or 8th generation screenshot converted to a gif...

We should get a cleaned up version of the FreeNAS favicon or use the favicon from the userguide.

PR: <https://github.com/freenas/webui/pull/1144>

Turns out the favicon that docs uses isn't the current one. This PR replaces all of our favicons with hi-res versions drawn from the vector version.
