

FreeNAS - Feature #41640

Add Google Team Drive support to middleware

08/14/2018 12:03 PM - . Hokan

Status: Done	Estimated time: 0.00 hour
Priority: No priority	
Assignee: Vladimir Vinogradenko	
Category: Middleware	
Target version: 11.2-BETA3	
Severity: Medium	Needs Merging: No
Reason for Closing:	Needs Automation: No
Reason for Blocked:	Support Suite Ticket: n/a
Needs QA: No	Hardware Configuration:
Needs Doc: No	

Description

It's nice to see some rclone support added (I'm using 11.2 Beta 2), but it's capable of much more than allowed for in the UI. I'm especially interested in using it to upload to Google Team Drives.

So, please, either

- add support for Team Drives, or
- expose the rclone config file so I can manually add the services I need.

- Target version changed from Backlog to 11.3

- Severity changed from New to Medium

Vladimir, can you please investigate what exactly is needed to support team drive? It seems we just need some extra attributes to "drive" rclone type?

. Hokan, do I understand correctly that the only thing you need is to add team_drive = xxxxxxxxxxxxxxxxxxxxxx to rclone remote config?

Probably correct. My `rclone`-generated config also has this line:

`scope = drive`

but `rclone` on FreeNAS seems to work without it.
