<b>Description</b> ik wil een iocage jail aanmaken op freenas 11.1 via command, maar de locatie zet hij op een andere volume neer dan dat ik wil.  heb een speciale sdd voor de jails maar hij zet het gewoon op een wd red neer. dit is ook het geval in de gui van 11.2 beta 2  kunnen jullie daar geen future voor maken dat dit in is te stellen.

I want to create an iocage jail on freenas 11.1 via command, but the location is set to a different volume than I want.

have a special sdd for the jails but he just puts it down on a wd red.  
this is also the case in the gui of 11.2 beta 2

you can not make a future for this to be possible.

I usually install jail per service. For example, I create a jail for each FreeBSD service such as Nginx/PHP/Perl/Python web service, MariaDB database server, Deluge, Duplicity/Rsnapshot backup service and more. <https://discord.software> <https://adobereader.onl> <https://itunes.red>
