

FreeNAS - Feature #45134

Umbrella # 44889 (Done): Move strings from typescript files into helptext files

Move strings from System section typescript files into helptext files

09/06/2018 01:31 PM - Erin Clark

Status: Done	Estimated time: 0.00 hour
Priority: No priority	
Assignee: Aaron Ervin	
Category: GUI (new)	
Target version: 11.2-U3	
Severity: Low	Needs Merging: No
Reason for Closing:	Needs Automation: No
Reason for Blocked:	Support Suite Ticket: n/a
Needs QA: No	Hardware Configuration:
Needs Doc: No	

Description

See ticket <https://redmine.ixsystems.com/issues/34086> and PR <https://github.com/freenas/webui/pull/1211>. To solve the issue of excess spaces and have a common place for tooltips, labels, validators and other helptext related items we will be putting them into their own helptext files. The helptext files should be in a common location with a similar hierarchy to where the files that use them are located (i.e. pages/account/groups should go in helptext/account/groups.ts) to keep things logical and organized. This ticket is to track the work of this for the system section.
