Description

See ticket <https://redmine.ixsystems.com/issues/34086> and PR <https://github.com/freenas/webui/pull/1211>. To solve the issue of excess spaces and have a common place for tooltips, labels, validators and other helptext related items we will be putting them into their own helptext files. The helptext files should be in a common location with a similar hierarchy to where the files that use them are located (i.e. pages/account/groups should go in helptext/account/groups.ts) to keep things logical and organized. This ticket is to track the work of this for the tasks section.
