

FreeNAS - Bug #45750

Fix traceback when listing plugins

09/11/2018 06:44 AM - William Grzybowski

Status: Done	
Priority: No priority	
Assignee: Brandon Schneider	
Category: Middleware	
Target version: 11.2-RC1	
Seen in: 11.2-BETA3	Needs Merging: No
Severity: Medium	Needs Automation: No
Reason for Closing:	Support Suite Ticket: n/a
Reason for Blocked:	Hardware Configuration:
Needs QA: No	ChangeLog Required: No
Needs Doc: No	

Description

```
RuntimeError: Please specify a pool to activate with iocage activate POOL
File "middlewared/main.py", line 155, in call_method
    result = await self.middleware.call_method(self, message)
File "middlewared/main.py", line 1033, in call_method
    return await self._call(message['method'], serviceobj, methodobj, params, app=app, io_thread=F
else)
File "middlewared/main.py", line 970, in _call
    return await self._call_worker(serviceobj, name, *args)
File "middlewared/main.py", line 997, in _call_worker
    job,
File "middlewared/main.py", line 928, in run_in_proc
    return await self.run_in_executor(self.__procpool, method, *args, **kwargs)
File "middlewared/main.py", line 913, in run_in_executor
    return await loop.run_in_executor(pool, functools.partial(method, *args, **kwargs))
```

Traceback above happens when calling:

```
{
'id': '7479a34d-1573-5942-3c90-d62a5eedf9fd',
'method': 'jail.list_resource',
'msg': 'method',
'params': [
'PLUGIN',
True
]
}
```

We need to figure out why this method is being called if it should not be.
If not why do we need iocage configure while listing plugins.
