

FreeNAS - Bug #46964

Fix sending multiple vm.clone calls when cloning a VM

09/18/2018 06:59 AM - William Grzybowski

Status: Done	
Priority: No priority	
Assignee: Damian Szidiropulosz	
Category: GUI (new)	
Target version: 11.2-RC1	
Seen in:	Needs Merging: No
Severity: New	Needs Automation: No
Reason for Closing:	Support Suite Ticket: n/a
Reason for Blocked:	Hardware Configuration:
Needs QA: No	ChangeLog Required: No
Needs Doc: No	
Description	
It seems cloning a single VM will send a websocket call to clone "N" VMs. N being the number of existing VMs.

I have tried to fix this issue but I am not able to point why there are multiple vm.clone calls however I can point out that when it happens.

the number of times vm.clone call on a single click is dependent on how many vm were tried to be cloned on a single vm, without navigating away from the page. seems like VmClone event is fired due to the fact that dispatch table grows.
