

FreeNAS - Bug #48996

Add webserver to BackupPC Plugin

09/30/2018 01:30 PM - Jim Shaw

Status: Done	
Priority: No priority	
Assignee: Martin Wilke	
Category: OS	
Target version: 11.2-RC2	
Seen in: 11.2-BETA3	Needs Merging: No
Severity: New	Needs Automation: No
Reason for Closing:	Support Suite Ticket: n/a
Reason for Blocked:	Hardware Configuration:
Needs QA: No	ChangeLog Required: No
Needs Doc: No	
Description	
FreeNAS-11.2-BETA3 BackupPC Plugin	
I've installed the plugin, the jail runs correct and seems to have IP connectivity. However no web service is running in 8080 as the instructions for management would suggest.	
Through the command <code>iocage console backuppc</code> , I have run the tests in the instructions all seems to be working well. The Backuppc log shows the service running.	
I havn't been able to find a web service (eg apache or httpd) log, i'm guess this is really the issue.	
<pre>root@backuppc:/ # sockstat USER COMMAND PID FD PROTO LOCAL ADDRESS FOREIGN ADDRESS backuppc perl 24988 4 stream /var/run/BackupPC/BackupPC.sock root login 24949 3 dgram -> /var/run/logpriv root cron 22906 4 dgram -> /var/run/logpriv root syslogd 22843 4 dgram /var/run/log root syslogd 22843 5 dgram /var/run/logpriv</pre>

#2 - 09/30/2018 03:08 PM - Dru Lavigne

- Category changed from Services to OS
- Assignee changed from Release Council to Martin Wilke
- Target version changed from Backlog to 11.2-RC1

#3 - 10/10/2018 06:04 AM - Dru Lavigne

- Target version changed from 11.2-RC1 to 11.2-RC2

This requires adding Apache to the plugin (as the FreeBSD port does not).
