

FreeNAS - Bug #4910

"Everyone" given special permissions in CIFS share

05/01/2014 07:50 AM - Nick Card

Status:	Resolved	
Priority:	Nice to have	
Assignee:	John Hixson	
Category:	OS	
Target version:	Master - FreeNAS Nightlies	
Seen in:	9.2.1.5-RELEASE	Needs Merging: Yes
Severity:	New	Needs Automation: No
Reason for Closing:		Support Suite Ticket: n/a
Reason for Blocked:		Hardware Configuration:
Needs QA:	Yes	ChangeLog Required: No
Needs Doc:	Yes	
Description		
<p>When I create a new CIFS share, the "Everyone" account is given special permissions to "Delete subfolders and files". This means that, if you create a share, and you allow guest access, then anyone can delete all of your things. Even if you don't allow guest access, the permissions are still set that same way.</p> <p>It's easy enough to fix this after-the-fact by changing the permissions, but it's kind of a pain when you've got a handful of shares, and if you miss one, all your data can be deleted by anyone.</p>
