

## FreeNAS - Bug #5029

### Add new LazyLibrarian Plugin

05/18/2014 06:44 PM - Joshua Ruehlig

<b>Status:</b>	Resolved	
<b>Priority:</b>	Nice to have	
<b>Assignee:</b>	Joshua Ruehlig	
<b>Category:</b>	Middleware	
<b>Target version:</b>	N/A	
<b>Seen in:</b>	9.2.1.5-RELEASE	<b>Needs Merging:</b> Yes
<b>Severity:</b>	New	<b>Needs Automation:</b> No
<b>Reason for Closing:</b>		<b>Support Suite Ticket:</b> n/a
<b>Reason for Blocked:</b>		<b>Hardware Configuration:</b>
<b>Needs QA:</b>	Yes	<b>ChangeLog Required:</b> No
<b>Needs Doc:</b>	Yes	
<b>Description</b>		
See the attached PBI, tell me what additional information you need. Thanks!		
Name ~ LazyLibrarian Description ~ LazyLibrarian is a program to follow authors and grab metadata for all your digital reading needs. It uses Goodreads.com (for author info and book info) websites as a source. Version ~ 2.1 License ~ GPLv3		

### History

#### #1 - 05/18/2014 10:47 PM - Jordan Hubbard

- Category set to 33
- Assignee set to Sean Fagan
- Target version set to 49

#### #2 - 05/18/2014 11:31 PM - Cyber Jock

I will warn you this is **extremely** unlikely. LazyLibrarian is no longer actively developed and even the official git repo is dead.

Overall, this isn't something you should expect the FreeNAS team to do as it's not as simple as "packing up a PBI". It'll require coding up LazyLibrarian to work and that's just not something FreeNAS should be paying developers to do. That's like asking FreeNAS developers to work on some Windows software.

Just search the forums and you'll see this is a non-viable request.

I packaged the PBI already (attached to the first post), and there is an actively developed repo here <https://github.com/DobyTang/LazyLibrarian>

**#4 - 05/19/2014 10:43 AM - Sean Fagan**

- Status changed from Unscreened to Screened

Information needed:

Name (LazyLibrarian, so yay), author, category (Multimedia?), short description, image (which needs to be uploaded), a set of keywords, license type, and a URL.

However, it also needs a reason to exist as a plugin. It's not clear to me why this is something that should run on the NAS, as opposed to something that would run on another machine and use the NAS for storage.

But from what I've heard that's a fork of the original. Is it not?

Yeah.. I didn't see your PBI attached. In fact, I didn't respond to this ticket. I had originally responded to a ticket that asked for someone to write one.

**#6 - 05/19/2014 12:05 PM - Cyber Jock**

It looks like the original is here: <https://github.com/itsmegb/LazyLibrarian>

Hasn't been updated since July 2012. My only complaint is that using the same name as the original is not good form. People are going to get confused. Heck, they've been confused in the forums over similar things related to the name. Even I'm sitting here scratching my head wondering how things got so messed up.

My recommendation would be to make a fork of the original project with a unique name so as to prevent any confusion. Then, accept **that** into the FreeNAS plugin list.

@Sean-

There's been a very small number of users that request this PBI. If someone else wants to manage it I say let them. I'd strongly recommend you require a name change to prevent confusion because 2 projects with the same name cannot be a good thing...

**#7 - 05/19/2014 12:19 PM - Joshua Ruehlig**

I think the one you linked isn't even the original one. this project was forked with several different people 'maintaining' it. is has finally found a home with active development.

I don't think renaming it is necessary, this is as official a fork as any of the other ones. I believe the 'original' project was abandoned/deleted and the original developer jumped to XDM.

I'll upload the needed information when I get home.

As for justification, this is a headless webgui Python program used to manage eBook and magazine collections. most people using a smart phone / windows computer would run this on a central unix server instead of trying to run it on their client device(s). multiple users would also prefer to use this on a central server.

this program is in the same vein as sickbeard/headphones/mylar, it can organize, manage and download media through a web interface. It works best when running on the same machine as sabnzbd/transmission.

- File *lazylibrarian.ico* added

Name - LazyLibrarian

(Current) Author - DobyTang

Category - Deskutils

Short Description - A program to follow authors and grab metadata for all your digital reading needs.

Image - See Attached

Keywords - eBooks, multimedia, books, magazines

License - GPLv3

URL - <https://github.com/DobyTang/LazyLibrarian>

**#10 - 05/21/2014 10:57 PM - Joshua Ruehlig**

Did you need addition information or justification for this plugin? Thanks

**#11 - 05/21/2014 11:18 PM - Sean Fagan**

There are some issues with some of hte other plugins; until we know why, I did not want to add another one.

**#12 - 05/21/2014 11:51 PM - Joshua Ruehlig**

Sounds good, thanks for the update.

Also l/we gotta figure out the user/group name for btsync+syncthing.

**#13 - 06/01/2014 05:10 PM - Joshua Ruehlig**

Any update on the plugins system and getting this plugin added?

**#14 - 06/03/2014 11:14 AM - Sean Fagan**

- *Status changed from Screened to Fix In Progress*

Okay, done. Hopefully it works. It will take a while for it to spread its way out.

**#15 - 06/04/2014 06:20 PM - Sean Fagan**

- *Status changed from Fix In Progress to Resolved*

- *Assignee changed from Sean Fagan to Joshua Ruehlig*

Appears to be there.

**#16 - 06/04/2014 10:25 PM - Joshua Ruehlig**

Sean Fagan wrote:

Yup, looks good.

Thanks!

**#17 - 07/19/2017 08:24 AM - Kris Moore**

- Target version changed from 49 to N/A
